So You Want to Start a Science Podcast?

Our Guest Speakers

Hello and welcome to *"So You Want To Start a Science Podcast?"*, a six-part collaborative series produced by the *"Your Digital Mentor Podcast"* and Wellcome Connecting Science.

The objective of this series is to explore podcast production for life scientists and life science communicators. In this fifth episode, we'll discuss key topics, including how to promote your podcast and how to engage with your audience.

The series is narrated by Dr Sophie Prosolek, PhD, and features various, diverse guests from the world of life science communication. A full list of guest speakers and their professional profiles can be found below:

Meet Anne Chisa - PhD Researcher & Science Communicator

Podcast Title: The Root of The Science

Anne Chisa is a pioneer podcaster amongst the African women in STEM space. While she's still in the thick of her PhD studies, Anne has built an impressive media presence, being featured both online and in national (TV) media. Despite speaking openly about her struggles with burnout, she has managed to turn The Root of the Science into an international endeavour with colleagues across the African continent in her team.

Meet Desmond Jumbam - Researcher, Writer & Global Health Advocate

Podcast Title: Global Health Unfiltered

Dr Desmond Jumbam is a researcher and perpetual optimist. He is passionate about strengthening health systems in Africa with an emphasis on improving access and quality of surgical care for the most vulnerable people. Desmond co-hosts the biweekly Global Health Unfiltered Podcast about the unspoken realities of global health in Africa and the World.

Meet Karan Bhatta - Writer, Editor & Science Communicator

Podcast Titles: Wise Dumb/Wise Dumb Nepali

Karan Bhatta is a researcher and writer with a knack for identifying compelling stories told through his bilingual video podcast Wise Dumb and Wise Dumb Nepali. Karan provides an engaging space for Nepali voices to discuss socially relevant topics from the science of cosmetics to women's plight in climate change.

Meet Niamah Callahchand - Pharmacist & Engagement Specialist

Podcast Title: Behind The Genes

Niamah Callachand is Head of Product Engagement & Growth at Genomics England - she's also the host and strategic lead of the Behind the Genes podcast team. Her clinical background as a qualified pharmacist and extensive communications experience mean she's perfectly positioned to craft engaging messages that foster collaboration, understanding and inspiration amongst listeners.

Meet Christenine Bionett - Health Data Scientist & Podcast Producer

Podcast Title: Your Digital Mentor Podcast

Christine is no stranger to developing freely available online training. After winning a Europe-wide contest held by Training in Tropical Diseases, Dr Christine Boinett led a team to create and produce the 'Your Digital Mentor Podcast' series in partnership with Wellcome Connecting Science. A freely available resource that aims to provide access to conversations around mentoring and other aspects of research and career development, with a focus on low-and middle-income countries.

Meet David Mendes - Science Communicator, Speaker & Facilitator

Podcast Title: Papa PhD

After trying to find clarity about his post-PhD career, Dr David Mendes was inspired to start the Papa PhD podcast and to help young scientists navigate the job market. David talks with graduate researchers, postdocs, academics and career experts to help others identify a fulfilling career path - and he does so in both French and English!

Meet Ruth Nanjala - PhD Researcher & Science Communicator

Podcast Title: My Science Journey

Ruth Nanjala is a scientist, storyteller and communicator passionate about amplifying African voices in STEM. Alongside her PhD studies in Molecular Medicine (and leading the My Science Journey podcast), Ruth acts as a Student Facilitator for the Africa Oxford Initiative - a cross-university platform that supports collaborative work between University of Oxford and researchers across the African continent.
